

AnteRoom Extenders & Reducers

The standard HEPACART AnteRoom is intended for a single door size, 36in or 48in wide, but has the option to add attachable Extenders and Reducers for a custom fit. These extenders and reducers attach directly to your AnteRoom and provide a magnetic seal on the doorframe you adjust to.

Reducers are mounted inside the unit, and are sold in pairs. This allows you to reduce the right, left, or both sides.

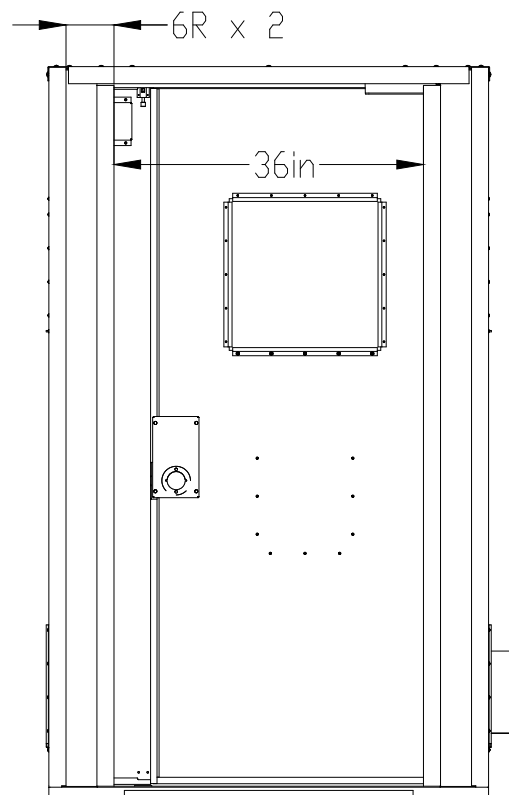

Extenders are mounted to the outside of the unit, and are sold individually. Extenders attach universally to either side.

Simply measure your door's width and height. These charts below will help you determine what adaptors are needed to fit your AnteRoom to an existing door.
