

HEPACART ENCLOSURE OPTIONS

HEPACART® and DUSTBUGGY® containment carts are available with many different flexible enclosure options. White and Translucent are made from an antimicrobial, non-woven, anti-static, and fire-resistant material that is durable and easy to clean. Containment carts can also be fitted with a fully transparent enclosure for maximum visibility or high temperature silicone fabric when welding sparks or flame are of concern. Window curtains have one fixed window on each of the long sides. Wall Access curtains have one fixed window and one that folds down from the inside. More information on window dimensions and height can be found on the HEPACART spec sheets.
