

CAP ACCESS SPEC SHEET

HEPACART® CAP patented series of wire pulling devices to help protect wire, ceiling, grid systems, and occupants while adding productivity. CAPs will guide wires and cables through an opening into the ceiling while utilizing a roller system to protect the wiring. The opening uses a horsehair bristles to keep dust, dirt and debris from falling out of the ceiling. The CAP ACCESS features a detachable insert panel for easy access and installation.

Features:

- Detachable insert to fit around existing vertical runs
- Clean look when used for permanent installation over IT equipment rack
- Aluminum construction
- Four (4) rollers per unit
- Replaceable horsehair bristles and rollers
- Can be supported from building structure
- US Patent #8397451
