

CAP VISION SPEC SHEET

HEPACART® CAP patented series of products of wire pulling devices to help protect wire, ceiling, grid systems, and occupants while adding productivity. CAPs will guide wires and cables through an opening into the ceiling while utilizing a roller system to protect the wiring. The opening uses a horsehair bristles to keep dust, dirt and debris from falling out of the ceiling.

Features:

- Same as CAP CLASSIC with a clear window in the center allowing installer to monitor the cable being pulled.
- Aluminum and Lexan construction
- Four (4) rollers per unit
- Standard CAP VISION fits 2' x 2' grid (available 2' X 4' with CAP EXTEND)
- Replaceable horsehair bristles and rollers
- Starting at 8 pounds
- Can be supported from building structure
- US Patent #8397451

HEPACART® CAP VISION	
Model	CAP-W
Weight	8 lbs.
Approximate Dimensions	24" x 24" x 3.5"
Opening Dimensions	6" x 2"
Grid Size Compatible	2' x 2'
Number of Rollers	4

*Not fully aluminum
